

THE LEMONADE DETOX

A complete guide to your 10 day reset

BY JOEL POLLEY RN BSN

THE LEMONADE DETOX

Your Complete 10-Day Master Cleanse Guide

Welcome to Your Transformation Journey

Congratulations on taking the first step toward resetting your body and mind! This guide will walk you through everything you need to know about the Master Cleanse—also known as the Lemonade Detox—a time-tested protocol that has helped thousands achieve rapid weight loss, increased energy, and a complete dietary reset.

Whether you're looking to jumpstart a healthier lifestyle, break free from food addictions, or simply give your digestive system a rest, this 10-day program offers a proven pathway to transformation.

What Is the Master Cleanse?

The Master Cleanse is a liquid fasting protocol developed by Stanley Burroughs in 1941. Originally designed to treat ulcers and promote natural detoxification, this simple yet powerful program has maintained enduring popularity for over 80 years.

What makes it unique?

- **Liquid-only fast:** No solid food for 10 days
- **Simple formula:** Just 4 main ingredients
- **Accessible:** Can be done at home with common ingredients
- **Time-tested:** Backed by decades of user experience and recent scientific research

The Promise:

- Weight loss of 5-12 pounds in 10 days
 - Increased energy and mental clarity
 - Reduced inflammation
 - Reset of eating habits and taste preferences
 - Glowing, clearer skin
 - Enhanced digestive function
-

The Science Behind the Lemonade Cleanse

While critics argue the body doesn't need "detox" programs (your liver and kidneys already detoxify continuously), scientific research has documented measurable benefits from the Master Cleanse protocol.

Published Research Findings

A 2015 study in the *Journal of Nutrition* examined 84 premenopausal women who completed a 7-day lemon detox diet. The results were remarkable:

Body Composition Changes:

- Significant reductions in body weight, BMI, and body fat percentage
- Notable decrease in waist-hip ratio

- Average weight loss of 5-12 pounds

Metabolic Improvements:

- Decreased serum insulin levels
- Improved insulin sensitivity (lower HOMA-IR scores)
- Reduced leptin and adiponectin levels

Anti-Inflammatory Effects:

- Significant decrease in hs-CRP (high-sensitivity C-reactive protein)—a key marker of systemic inflammation and cardiovascular disease risk
- This benefit occurred exclusively in the lemon detox group, not in control groups

Safety Markers:

- Hemoglobin and hematocrit levels remained stable
- No adverse hematological changes despite severe caloric restriction

How It Works

The Master Cleanse works primarily through **caloric restriction** and **digestive rest**. By consuming only 600-800 calories daily from simple carbohydrates, your body:

1. **Depletes glycogen stores** (leading to initial water weight loss)
2. **Rests the digestive system** (freeing energy for other processes)
3. **Reduces systemic inflammation** (through elimination of inflammatory foods)
4. **Resets taste preferences** (helping break addiction to processed foods)

The daily laxative protocol and salt water flush ensure continuous elimination, preventing buildup and promoting regular detoxification through natural channels.

The Master Cleanse Recipe

Single Serving (8-10 oz)

Ingredients:

- **2 tablespoons** fresh-squeezed organic lemon juice (approximately ½ lemon)
- **2 tablespoons** pure organic maple syrup (Grade A Dark Robust, formerly Grade B)
- **1/10 teaspoon** cayenne pepper (or more to taste)
- **8-10 ounces** purified or spring water (room temperature or slightly warm)

Mixing Instructions:

1. Squeeze fresh lemon juice into your glass (do not use bottled lemon juice)
2. Add maple syrup
3. Add cayenne pepper (start small and increase to tolerance)
4. Add water and stir thoroughly
5. Drink immediately for best results

Daily Consumption

Drink 6-12 glasses per day—essentially whenever you feel hungry. There is no upper limit. Most people consume 8-10 glasses daily, but you can drink more if needed to manage hunger.

Why These Specific Ingredients?

Lemon Juice: Provides vitamin C, cleanses and alkalizes the body, stimulates digestive juices

Maple Syrup: Supplies essential minerals (manganese, zinc) and enough calories to sustain energy without triggering full digestion

Cayenne Pepper: Increases metabolism, improves circulation, helps break up mucus, adds thermogenic effect

Pure Water: Hydrates, helps flush toxins through kidneys, supports all bodily functions

Your Daily Protocol

MORNING (on empty stomach)

Salt Water Flush:

- Mix 2 teaspoons non-iodized sea salt in 1 quart (32 oz) warm water
- Drink the entire quart within 5 minutes
- Lie on your right side for 30 minutes if possible
- Expect bowelelimination within 30-90 minutes
- **Stay near a bathroom!**

Note: The salt water flush may be intense for first-timers. The salty taste is unpleasant but necessary. Some people prefer to drink it quickly through a straw.

THROUGHOUT THE DAY

Master Cleanse lemonade:

Additional pure water: Drink 6-12 glasses minimum

- Drink as much as desired
- **Peppermint tea:** Optional,for stomach comfort (no sweetener)

Tip: Prepare a full pitcher in the morning to simplify your day. Multiply the single-serving recipe by 8-10 servings.

EVENING (before bed)

Herbal Laxative Tea:

- Smooth Move tea (Traditional Medicinals) or any senna-based tea
 - Steep according to package directions
 - Drink 1 cup
 - Expect bowel movement in the morning
-

Your Complete Shopping List

Ingredients for 10 Days

- ☐ **Organic lemons:** 30-40lemons (3-4 per day)
- ☐ **Organic maple syrup:** 64oz (Grade A Dark Robust/formerly Grade B)
- ☐ **Organic cayenne pepper:** 1 small container
- ☐ **Sea salt (non-iodized):** 1container (Celtic or Himalayan)
- ☐ **Herbal laxative tea:** 1-2boxes (Smooth Move or senna tea)
- ☐ **Peppermint tea:** 1box(optional, for comfort)
- ☐ **Purified or spring water:** Several gallons

Helpful Tools

- ☐ Manual lemon juicer or reamer
- ☐ Measuring spoons (tablespoon, teaspoon)
- ☐ Large pitcher (for making batches)
- ☐ 10-12 oz drinking glass or water bottle
- ☐ 1-quart measuring container (for salt flush)

Estimated Total Cost: \$107-\$123

The 4-Day Preparation Phase

DO NOT skip this phase! Proper preparation dramatically reduces withdrawal symptoms and increases your success rate.

Days 1-2: Eliminate Trigger Foods

Remove from your diet:

- ☒ Meat and poultry
- ☒ Dairy products
- ☒ Processed foods
- ☒ Caffeine (coffee, tea, soda)
- ☒ Alcohol
- ☒ Added sugars and artificial sweeteners

Emphasize:

- ☒ Raw fruits
- ☒ Raw vegetables
- ☒ Whole grains
- ☒ Plenty of water

Day 3: Transition to Liquids

Consume only:

- Fresh fruit juices (preferably diluted with water)

- Green smoothies
- Vegetable broths
- Herbal teas
- Water

Day 4: Pre-Cleanse Final Prep

Consume only:

- Fresh-squeezed orange juice (diluted 50/50 with water)
- Pure water
- **Evening:** Drink laxative tea before bed

Day 5: BEGIN THE MASTER CLEANSE

Wake up and perform your first salt water flush, then begin drinking the lemonade mixture throughout the day.

Day-by-Day: What to Expect

Days 1-2: The Adjustment Period

Physical Symptoms:

- Headaches (often intense, especially if caffeine/sugar dependent)
- Fatigue and low energy
- Hunger pangs
- Irritability and mood swings
- Possible nausea
- Body aches

Mental State:

- Food obsession (thinking about eating constantly)
- Questioning your decision
- Temptation to quit

Success Tips:

- Start on a weekend or during light workdays
- Rest frequently
- Stay near a bathroom (salt flush effects)
- Drink extra lemonade when hungry
- Take aspirin for headaches if needed
- Remind yourself Day 2 is typically the hardest

Days 3-4: The Breakthrough

Physical Changes:

- Headaches begin to subside
- Energy starts returning
- Hunger becomes manageable
- Tongue may develop white coating (normal)

- Bad breath (from ketosis)

Mental Shifts:

- Greater mental clarity emerging
- Less food obsession
- Growing confidence in the process
- Mood stabilization

Success Tips:

- Celebrate making it through the hardest days
- Notice improvements in how you feel
- Stay hydrated beyond just the lemonade
- Gentle walking or stretching only—no intense exercise

Days 5-7: Finding Your Rhythm

Physical Benefits:

- Increased and sustained energy
- Skin begins to clear and glow
- Eyes appear brighter
- Improved mood
- Better sleep quality
- Sense of lightness

Mental State:

- Reduced obsession with food
- Enhanced focus and concentration
- Feeling of accomplishment
- Renewed motivation

Success Tips:

- Maintain your routine consistently
- Journal your experience
- Share progress with supporters
- Continue avoiding intense physical activity

Days 8-10: Peak Benefits

Physical Peak:

- Maximum energy levels
- Clearest skin
- Sharp mental clarity
- Heightened senses (taste, smell)
- Feeling of wellness and vitality
- Significant visible weight loss

Mental State:

- Sense of mastery and control
- Confidence in completing the program

- Excitement about results
- Already planning post-cleanse eating

Success Tips:

- Don't end early—finish strong
 - Begin planning your transition phase
 - Take before/after measurements and photos
 - Reflect on what you've learned about your relationship with food
-

The 4-Day Exit Phase: CRITICAL FOR SUCCESS

⚠ WARNING: Do not immediately return to solid food after completing Day 10! Doing so can cause severe nausea, vomiting, digestive distress, and stomach pain. Your digestive system needs gradual reintroduction.

Day 11: Orange Juice Only

- Fresh-squeezed orange juice throughout the day (diluted 50/50 with water if too intense)
- Pure water as needed
- Continue drinking lemonade if desired
- Herbal teas

Day 12: Add Vegetable Juices and Broths

- Continue orange juice in the morning
- Add fresh vegetable juices (carrot, celery, cucumber, spinach)
- Light vegetable broths
- Water and herbal teas

Day 13: Introduce Raw Fruits and Vegetables

- Continue juices and broths
- Add raw fruits: watermelon, grapes, berries (easy to digest)
- Add raw vegetables: cucumber, tomatoes, leafy greens
- Small amounts—eat slowly

Day 14: Gradually Add Solid Foods

- Continue juices in the morning
- Add whole grains: oatmeal, quinoa, brown rice
- Add cooked vegetables: steamed or lightly sautéed
- Light soups
- Still avoid: meat, dairy, processed foods, heavy fats

Days 15+: Return to Normal Eating

- Gradually reintroduce all foods
 - **Recommendation:** Use this as an opportunity to establish healthier eating patterns
 - Many people find their taste preferences have changed—processed foods taste overly salty or sweet
 - Listen to your body's signals about what makes you feel good
-

Potential Benefits You May Experience

Based on scientific research and thousands of user testimonials:

Physical Benefits

✓ **Weight loss:** 5-12 pounds in 10 days (results vary) ✓ **Increased energy levels** (after initial adjustment) ✓ **Clearer, brighter skin** with healthy glow ✓ **Reduced inflammation** throughout the body ✓ **Improved digestion** and regular elimination ✓ **Better sleep quality** ✓ **Reduced bloating** and water retention

Mental & Emotional Benefits

✓ **Enhanced mental clarity** and focus ✓ **Improved mood** and emotional stability ✓ **Heightened senses** of taste and smell ✓ **Greater awareness** of eating habits ✓ **Sense of accomplishment** and self-control ✓ **Psychological "reset"** of food relationships

Long-Term Effects

✓ **Changed taste preferences** (processed foods taste different) ✓ **Reduced cravings** for sugar and unhealthy foods ✓ **Motivation** to maintain healthier eating ✓ **Improved insulin sensitivity** ✓ **Reduced cardiovascular risk markers**

Possible Side Effects & Solutions

Understanding potential side effects helps you prepare and prevents premature quitting.

Headaches (Days 1-3)

Cause: Caffeine and sugar withdrawal **Solutions:**

- Stay well-hydrated with extra water
- Rest frequently
- Take aspirin or ibuprofen if needed
- Apply cold compress to forehead
- Know this will pass by Day 3-4

Low Energy (Days 1-3)

Cause: Caloric restriction, body adjusting to ketosis **Solutions:**

- Drink more lemonade (no upper limit!)
- Rest when needed—don't push yourself
- Avoid intense exercise (walking only)
- Get adequate sleep (8-9 hours)
- Be patient—energy returns Days 3-4

Constant Chills

Cause: Reduced caloric intake, increased elimination **Solutions:**

- Layer clothing—dress warmly

- Take warm baths
- Drink warm lemon water instead of cold
- Use heating pads
- Know this is temporary

Frequent Bathroom Visits

Cause: Salt water flush and laxative tea doing their job **Solutions:**

- This is normal and expected!
- Plan to stay near a bathroom, especially mornings
- Avoid scheduling important meetings early in the day
- Use soft toilet paper or wipes
- Apply coconut oil if irritation occurs

Bad Breath & White Tongue Coating

Cause: Ketosis (body burning fat for fuel), detoxification **Solutions:**

- Brush tongue gently with toothbrush
- Rinse with diluted lemon water
- Know this is a sign the cleanse is working
- It will resolve after the cleanse ends

Irritability & Mood Swings

Cause: Blood sugar fluctuations, food addiction withdrawal **Solutions:**

- Practice self-care and self-compassion
- Communicate with family/friends about your process
- Engage in calming activities: prayer, gentle stretching, reading
- Journal your feelings
- Remind yourself this is temporary

Dizziness or Lightheadedness

Cause: Low blood pressure, electrolyte imbalance **Solutions:**

- Stand up slowly from sitting/lying positions
 - Drink more lemonade and water
 - Add slightly more salt to your salt flush
 - Rest when dizzy—don't push through
 - **If severe or persistent, discontinue cleanse and consult doctor**
-

Always Consult Your Healthcare Provider

Before beginning this or any cleanse program, consult with your doctor or qualified healthcare provider, especially if you have any health conditions or take medications. This guide is for educational purposes only and does not constitute medical advice.

Your Daily Tracker

Daily Tracking Template

Date: _____ Day # of Cleanse: _____

Morning:

- ☐ Salt water flush completed
- Time consumed: _____
- Bathroom result time: _____

Throughout Day:

- Lemonade glasses consumed: _____ (track with tally marks)
- Additional water: _____ glasses
- Peppermint tea: _____ cups

Evening:

- ☐ Laxative tea consumed
- Time: _____

Physical Measurements:

- Weight: _____ lbs (optional—weigh once weekly)
- Energy level (1-10): _____
- Mood (1-10): _____
- Number of bowel movements: _____

Symptoms Experienced: ☐ Headache ☐ Fatigue ☐ Dizziness ☐ Irritability ☐ Chills ☐ Hunger ☐ Nausea ☐ None

Notes & Observations:

Today's Victory:

10 Success Tips from Experienced Cleansers

Based on insights from thousands who have successfully completed the Master Cleanse:

1. Start on a Weekend or Light Week

Begin on Friday or Saturday so your hardest days (Days 1-3) fall when you have fewer obligations and can rest.

2. Tell Friends and Family

Inform your support system about what you're doing. Their understanding prevents social pressure to eat and provides encouragement when it's tough.

3. Remove Temptation Foods

Clear your home of trigger foods before starting. Don't torture yourself by keeping snacks visible. Store or give away items that will tempt you.

4. Plan Low-Key Activities

Schedule relaxing, non-food-centered activities: reading, gentle walks, movies, prayer, journaling, crafts. Avoid restaurants and social eating events.

5. Journal Your Experience

Write daily about your physical sensations, emotional states, challenges, and victories. This provides valuable insights and helps process the experience.

6. Listen to Your Body

While some discomfort is normal, severe pain, extreme dizziness, or concerning symptoms warrant stopping the cleanse and consulting a healthcare provider.

7. Stay Hydrated Beyond the Lemonade

Drink plenty of pure water and peppermint tea in addition to the lemonade. Proper hydration reduces side effects and supports elimination.

8. Get Adequate Sleep

Aim for 8-9 hours nightly. Your body is working hard to heal and reset—give it the rest it needs. Nap during the day if tired.

9. Practice Gentle Movement Only

Light walking or gentle stretching is fine. Avoid: running, weightlifting, HIIT, cycling, or any intense exercise. You don't have the calories to sustain it.

10. Celebrate Small Victories

Acknowledge each day completed. Reward yourself with non-food treats: a bath, a movie, new book, massage, or anything that makes you feel good.

Frequently Asked Questions

Can I exercise during the cleanse?

Light walking (15-30 minutes) or very gentle stretching is acceptable. Avoid any moderate to intense exercise-you're consuming only 600-800 calories daily, insufficient for demanding physical activity. Most people find they don't have energy for workouts during Days 1-4, but energy returns Days 5-10.

What if I'm extremely hungry?

Drink more lemonade! There is no upper limit on servings. Most hunger is psychological rather than physical. Drink water, distract yourself with activities, and remind yourself this is temporary. The first 3 days are hardest; hunger significantly decreases by Day 4.

Can I work during the cleanse?

Yes, most people work normal schedules. However, starting on a weekend is wise so your hardest adjustment days (Days 1-3) occur when you can rest. Be prepared for possible low energy and ensure you have bathroom access (especially mornings after salt flush).

Will I gain the weight back?

Some weight will return—specifically water weight and glycogen that were depleted initially. However, if you use the cleanse as a reset and transition to healthier eating habits, you can maintain fat loss achieved. The average person keeps off 3-5 of the 5-12 pounds lost.

Can I drink coffee or tea?

No caffeine is allowed during the cleanse. Caffeine is a stimulant that triggers digestion and interferes with the rest your digestive system needs. Expect withdrawal headaches Days 1-3 if you're a regular coffee drinker. Herbal teas (peppermint, chamomile) are acceptable.

What if I have to attend a social event?

If possible, avoid social eating events during your cleanse. If you must attend, bring your lemonade in a water bottle and explain you're doing a health reset. Most people are supportive. Focus on socializing rather than eating.

Can I chew gum?

No. Even sugar-free gum triggers digestive juices and breaks the fast. It also can increase hunger. If you need fresh breath, rinse with diluted lemon water.

Is this safe for diabetics?

No. The Master Cleanse is contraindicated for people with diabetes, especially insulin-dependent individuals. The lack of protein and fat combined with carbohydrate-only intake creates dangerous blood sugar instability. Consult your doctor about

safe cleansing alternatives.

Can I take my regular medications?

Continue all prescribed medications unless your doctor advises otherwise. Take them with a glass of lemonade. However, consult your healthcare provider before starting the cleanse to ensure no medication interactions.

What if I feel extremely weak or faint?

Some lightheadedness is normal, especially when standing quickly. However, extreme weakness, severe dizziness, chest pain, or other concerning symptoms are reasons to stop the cleanse immediately and consult a healthcare provider. Safety first—always.

Can I do the cleanse longer than 10 days?

Stanley Burroughs recommended 10-40 days, but most modern practitioners suggest 10 days as optimal for safety and results. Extending beyond 10 days without medical supervision risks serious nutritional deficiencies, metabolic acidosis, and other complications. If you want to continue, work with a qualified healthcare provider.

What about vitamins or supplements?

The Master Cleanse protocol does not include supplements during the 10 days. The maple syrup provides minerals, and the lemon provides vitamin C. If you're concerned about deficiencies, consult your healthcare provider about whether specific supplements are appropriate for your situation.

Understanding Your Results

Realistic Expectations

Weight Loss:

- Average: 5-12 pounds over 10 days
- Range: 3-15 pounds (varies by individual)
- Composition: Water, glycogen, some fat, possibly some muscle
- Sustainability: 3-5 pounds typically maintained long-term with healthy eating

Energy Levels:

- Days 1-3: Low, fatigue
- Days 4-7: Increasing, stabilizing
- Days 8-10: High, sustained

Digestive System:

- Rested and reset
- Regular elimination established
- Reduced bloating
- Changed taste preferences

What the Cleanse Does NOT Do

It does NOT:

- Remove specific "toxins" from your organs (your liver and kidneys already do this continuously)
- Permanently change your metabolism
- Replace the need for a healthy diet long-term
- Cure diseases or medical conditions
- Guarantee permanent weight loss without lifestyle changes

What the Cleanse DOES Do

It DOES:

- Provide caloric restriction leading to weight loss
 - Rest your digestive system
 - Reduce systemic inflammation (scientifically documented)
 - Break psychological food addictions
 - Reset taste preferences away from processed foods
 - Create awareness of emotional eating patterns
 - Provide a mental and physical "reset" experience
 - Jump-start motivation for healthier lifestyle changes
-

Maximizing Your Post-Cleanse Success

The Master Cleanse is most valuable as a **reset tool** rather than a standalone weight loss solution. Here's how to maintain your results:

Week 1 After Cleanse

- Follow the 4-day exit protocol carefully
- Continue avoiding processed foods
- Emphasize whole foods: fruits, vegetables, whole grains
- Stay well-hydrated
- Notice how different foods make you feel

Weeks 2-4 After Cleanse

- Gradually reintroduce all foods, but mindfully
- Notice your changed taste preferences—honor them
- Many people find they no longer crave sugar, fast food, or processed items
- Continue drinking lemon water in the mornings
- Maintain larger portions of vegetables and fruits

Long-Term Maintenance

- Consider doing the Master Cleanse seasonally (2-4 times per year) as a reset
 - Use the experience as motivation for permanent dietary improvements
 - Address emotional eating patterns identified during the cleanse
 - Build sustainable healthy eating habits rather than yo-yo dieting
 - Stay connected to the community of cleansers for ongoing support
-

Important Medical Disclaimer

This guide is for educational and informational purposes only. It is not intended as medical advice, diagnosis, or treatment. The Master Cleanse is a restrictive dietary protocol that may not be appropriate for everyone.

Before beginning this or any cleanse program:

- Consult with your physician or qualified healthcare provider
- Disclose all medical conditions and medications
- Discuss potential risks and contraindications
- Obtain medical supervision if you have any health concerns

During the cleanse:

- Listen to your body
- Discontinue if you experience severe symptoms
- Seek medical attention for concerning signs (chest pain, extreme weakness, severe dizziness, etc.)

The author and publisher:

- Make no guarantees about specific results
- Are not liable for any adverse effects or consequences
- Recommend medical supervision for anyone with health conditions
- Encourage personal responsibility and informed decision-making

Your health and safety are paramount. Use this guide wisely and in consultation with qualified healthcare professionals.

Conclusion: Your Journey Begins Now

You now have everything you need to successfully complete the Master Cleanse. You understand the protocol, the science, the timeline, potential challenges, and solutions.

Remember:

- Days 1-3 are the hardest—push through
- Your body is remarkably resilient and adaptive
- Thousands have successfully completed this cleanse before you
- The benefits you'll experience are worth the temporary discomfort
- This is 10 days out of your entire life—you can do this

Most importantly:

- Be kind to yourself throughout the process
- Celebrate each day completed
- Learn about your relationship with food
- Use this as a springboard to lasting healthy changes

You're not just cleansing your body—you're resetting your mind, breaking old patterns, and creating space for new, healthier habits.

Your transformation starts now. You've got this!

Need Additional Support?

Completing the Master Cleanse alone can be challenging. If you want extra guidance, accountability, and community support, explore our additional programs:

Community Support

Monthly group coaching with weekly calls, private community access, and expert guidance

Convenience Delivered

Complete detox kits with all organic ingredients shipped to your door—no shopping required

Personalized Protocols

One-on-one coaching with custom plans tailored to your unique body and health goals
