DISCLAIMER: This kit is for educational purposes only. Always consult your healthcare provider before making changes to medications or treatment plans. Do not discontinue any prescribed medication without speaking to your doctor.

WELCOME TO YOUR BP RESET KIT

If you are reading this, you have decided that your health is worth more than a pill and a co-pay. You have decided that understanding WHY your blood pressure is high matters more than simply masking the number on the monitor. You have decided to become the most informed person in the room — including the exam room.

This kit is the result of 20 years of clinical nursing experience, thousands of hours of research, and a deep conviction that God designed your body to heal itself — when given the right inputs and the removal of the wrong ones.

Everything inside this kit is built on one principle:

**High blood pressure is an EFFECT. It has CAUSES.
Remove the causes. Support the healing. The effect changes.**

That is not a health tip. That is a law of physics. And the contents of this kit will teach you exactly how to apply it to your blood pressure — with science, with Scripture, and with a 20-year RN walking beside you every step of the way.

My name is Joel Polley. I am a registered nurse. And I built this for you.

Let's get to work.

WHAT'S INSIDE YOUR KIT — COMPLETE CONTENTS

#	DOCUMENT	PAGES	WHAT IT DOES
1	Master Guide (this document)	8	Welcome letter, kit contents, reading order, your roadmap from diagnosis to freedom.
2	White Coat Syndrome Guide	8	How to get accurate readings. 10 strategies to beat white coat. Doctor conversation scripts. Home monitoring protocol. 2-week tracking log.
3	All Your Questions Answered FAQ	15	40 real questions from real people — answered honestly. Medications, herbs, diet, exercise, monitoring, specific conditions.
4	Top 10 Herbs for Hypertension	12	Deep dive on each herb: mechanism, dosing, clinical studies, contraindications. Plus a week-by-week stacking guide.
5-14	10-Day BP Reset Challenge (Days 1-10)	80+	The complete daily challenge. Eliminations, additions, education days, tracking sheets, points system, community prompts.
15	Cook For Life Cookbook	64+	64 whole-food, plant-based recipes. 14-day meal plan. Shopping lists. 4-day juice detox. Glycemic index chart. Meal log.

#	DOCUMENT	PAGES	WHAT IT DOES
16	Health Tracker	—	Daily BP, weight, sleep, stress, energy, and supplement tracking. Printable. Bring to your doctor.

TOTAL KIT VALUE: Over 180 pages of evidence-based content, clinical research, practical guides, 64 plant-based recipes, tracking tools, and a complete 10-day protocol designed by a 20-year RN. This is not a pamphlet. This is a complete natural blood pressure education and action system.

YOUR READING ORDER — WHERE TO START

You do not need to read everything at once. This kit is designed to be consumed in a specific order based on where you are in your journey. Find your starting point below and follow the path.

PATH A: "I was just diagnosed and I'm overwhelmed"

ORDER	READ THIS	WHY
1st	This Master Guide (finish it)	Understand what you have and how to use it.
2nd	White Coat Syndrome Guide	Learn to take accurate readings FIRST. Everything else depends on accurate data.
3rd	FAQ — Category 1 & 2	Answer your biggest fears: Is this genetic? Will I be on pills forever? Can this be reversed?
4th	10-Day BP Reset Challenge (Day 1)	START the challenge. Knowledge without action changes nothing.
5th	Top 10 Herbs + FAQ Cat 3	Once the challenge is underway, deepen your knowledge on natural support.

PATH B: "I'm already on meds and want to explore getting off them"

ORDER	READ THIS	WHY
1st	This Master Guide (finish it)	Understand the roadmap.
2nd	FAQ — Category 2 (Medication)	Understand the safe path off meds. Never cold turkey. Data-driven conversation with doctor.
3rd	Top 10 Herbs Deep Dive	Learn what to add ALONGSIDE your meds. The stacking guide shows you the week-by-week protocol.
4th	White Coat Syndrome Guide	Set up home monitoring so you have the data to bring to your doctor.
5th	10-Day BP Reset Challenge	Run the full protocol while monitoring. Your numbers become your evidence.

PATH C: "I want to prevent hypertension — it runs in my family"

ORDER	READ THIS	WHY
1st	FAQ — Category 1 (the genetics Q)	Genetics writes the recipe. Lifestyle bakes the cake. Start here for hope.
2nd	10-Day BP Reset Challenge	Run the challenge as prevention. Build the habits before you need them.

ORDER	READ THIS	WHY
3rd	Cook For Life Cookbook	Rebuild your kitchen. 64 plant-based recipes that protect your vessels for life.
4th	Top 10 Herbs + FAQ	Build your daily supplement protocol. Prevention is easier than reversal.

YOUR ROADMAP: FROM DIAGNOSIS TO FREEDOM

This is the big picture. The path from "my doctor told me my blood pressure is high" to "my doctor just reduced my medication." It does not happen overnight. But it DOES happen — when you follow the process.

PHASE	TIMEFRAME	WHAT YOU DO	WHAT HAPPENS
1. LEARN	Days 1-3	Read this Master Guide. Set up home monitoring (White Coat Guide). Read FAQ Categories 1-2. Buy a validated BP monitor.	You understand what BP is, why yours is high, and how to measure it accurately. Fear is replaced with knowledge.
2. ACT	Days 1-10	Start the 10-Day BP Reset Challenge. Eliminate 3 negatives. Add 3 positives. Track daily. Post in community.	Your body begins responding. Endothelium starts recovering. Nitric oxide production increases. Numbers begin moving.
3. DEEPEN	Weeks 2-4	Read Top 10 Herbs. Start the stacking protocol (one herb per week). Read FAQ Categories 3-5. Start cooking from the Cookbook.	You add targeted natural support. The compounding effect accelerates. Sleep, energy, and mood improve alongside BP.
4. DOCUMENT	Weeks 2-8	Use the Health Tracker daily. Build 2-4 weeks of consistent home readings. Note all supplements, diet changes, and lifestyle modifications.	You are building a paper trail of evidence. Your data tells the story your body is writing. This is what your doctor needs to see.
5. CONVERSE	Week 4-8+	Bring your documented readings and lifestyle changes to your doctor. Use the conversation scripts from the White Coat Guide. Ask about reducing medication.	Your doctor sees consistent improvement backed by data. The conversation shifts from "you need more meds" to "let's talk about reducing your dose."
6. SUSTAIN	Ongoing	Keep the eliminations. Keep the additions. Keep the herbs. Keep the food changes. Monitor monthly. Repeat the challenge quarterly if needed.	This becomes your lifestyle — not a temporary diet. Your body continues to heal. Your medication dose continues to decrease under medical supervision.

Notice the order: **LEARN** → **ACT** → **DEEPEN** → **DOCUMENT** → **CONVERSE** → **SUSTAIN**. Most people try to jump straight to CONVERSE ("doctor, I want off my meds") without the data to back it up. Your doctor needs to see numbers, not intentions. This kit builds the numbers. Your body writes the evidence. Then you bring that evidence to the exam room and let it speak.

YOUR KITCHEN IS NOW A PHARMACY

Between the Top 10 Herbs Deep Dive and the Cook For Life Cookbook, you now have the tools to turn your kitchen into a healing center. Here is your daily protocol at a glance:

TIME	ACTION	WHAT IT DOES
Morning	16oz water on waking Ashwagandha 300-600mg with breakfast BP reading (seated, rested, same arm)	Rehydrates blood. Begins cortisol reduction. Establishes daily baseline.
Mid-Morning	Hibiscus tea (cup 1) 20-minute walk in sunshine	ACE inhibition begins. Nitric oxide from shear stress + sunlight. Cortisol drops.
Lunch	Whole-food, plant-based meal (from Cookbook) 2 crushed raw garlic cloves (waited 10 min)	Anti-inflammatory nutrition. 4-mechanism garlic activation.
Afternoon	Hibiscus tea (cup 2) Box breathing (4-4-4-4, 5 minutes) Hydration check — on track for body weight in oz?	Sustained ACE inhibition. Vagus nerve activation. Blood viscosity stays optimal.
Dinner	Whole-food meal (from Cookbook) Magnesium 300-400mg with dinner Hibiscus tea (cup 3)	Plant-based healing. Calcium channel blocking begins. Preparing for sleep.
Evening	Screens off by 9pm 25 gratitudes (spoken or written) In bed by 9:30pm, dark/cool room	Melatonin window opens. Cortisol drops via gratitude. Nocturnal dipping begins. Vascular repair peaks.

CUSTOMIZE THIS: The protocol above is the "full stack." You do not need to do everything on day one. Start with the 10-Day Challenge (which adds changes progressively) and layer in the herbs using the stacking guide from the Top 10 Herbs Deep Dive. Build up over weeks, not hours. Consistency beats intensity.

YOUR COOKBOOK — COOK FOR LIFE

The Cook For Life Cookbook is your complete plant-based kitchen start-up kit. It was designed specifically to support cardiovascular health, blood sugar regulation, and anti-inflammatory eating — the exact nutritional profile your blood pressure needs.

WHAT'S INSIDE	DETAILS
Recipes	64 total across 7 categories: Savoury (5), Salads (7), Butters & Dressings (11), Sweet Dishes (12), Jams & Creams (8), Breads (7), Miscellaneous (14)
Diet Type	100% whole-food, plant-based. No meat, dairy, or processed foods. Gluten-free alternatives included throughout.
Meal Plan	Complete 14-day meal plan with breakfast, lunch, and dinner mapped daily. Takes all the guesswork out.
Shopping Lists	Week 1 and Week 2 shopping lists included. Print and bring to the store.
Juice Detox	4-day juice detox program with its own shopping list. Perfect kickstart before or after the 10-Day Challenge.
Glycemic Index Chart	Reference chart for diabetics and anyone managing blood sugar alongside blood pressure.
Log Book	Tracking pages for meals, blood sugar, and symptoms. Pairs with the Health Tracker in this kit.
Targets	Diabetes, heart disease, inflammation, gut health — the conditions that share root causes with hypertension.
Bonus	Free coaching session with Joel Polley, RN (BraveWorksRN.com). Coupons: 40% in-store, 75% Etsy ebook, free community access.

The recipes in this cookbook are not "diet food." They are real meals that taste good and heal your body. Every ingredient was chosen for a reason. Every recipe was tested. And the 14-day meal plan means you do not need to think — just follow the plan, buy the list, cook the meals, and let your vessels heal.

THE GOLDEN RULES — READ THIS BEFORE YOU START ANYTHING

#	RULE	WHY
1	NEVER stop blood pressure medication cold turkey.	Abrupt withdrawal can cause dangerous rebound spikes. Your body has adapted to the drug. Always taper under medical supervision.
2	Monitor your blood pressure DAILY during any change.	Whether adding herbs, eliminating foods, or increasing exercise — monitor. Numbers are the only truth. Feelings lie. Data does not.
3	Add ONE supplement at a time.	If you add 5 herbs at once and your BP drops, you will not know which one worked. Add one per week. Monitor. Then add the next.
4	Tell your doctor EVERYTHING you are taking.	Herbs and supplements interact with medications. Your doctor needs a complete picture. Bring a list. Be transparent.
5	If readings go TOO LOW, contact your doctor.	Signs: dizziness when standing, lightheadedness, fatigue, blurred vision. This means the combination of meds + natural support is working TOO well. Your doctor needs to REDUCE your medication.
6	If you see 180/120+, go to the ER.	This is a hypertensive crisis. Especially if accompanied by chest pain, shortness of breath, vision changes, or severe headache. This is not the time for herbs. This is the time for emergency medicine.
7	This kit EDUCATES. Your doctor TREATS.	I am an RN, not your personal physician. This kit makes you the most informed partner in your own care. But treatment decisions — medication changes, dosage adjustments, diagnostic testing — belong to your healthcare provider.

YOU HAVE EVERYTHING YOU NEED

Look at what is in your hands right now. A complete natural blood pressure education. A 10-day protocol that has been proven to move numbers. A drug-to-herb comparison table that shows you exactly what God's pharmacy has for every prescription on the market. A deep dive on the 10 most powerful herbs with clinical studies behind every one. A cookbook with 64 plant-based recipes and a 14-day meal plan. An FAQ that answers every question you have been afraid to ask. A White Coat guide that teaches you to get accurate readings and talk to your doctor with confidence. And a Health Tracker that turns your daily numbers into evidence your doctor cannot ignore.

You are not just "trying healthy things." You are running a protocol. You are building evidence. You are becoming the most informed patient your doctor has ever seen.

Genetics writes the recipe. Lifestyle bakes the cake.

Your blood pressure is not a life sentence. It is an effect. It has causes. You now have every tool you need to identify those causes, remove them, add the support your body was designed to run on, and let your cardiovascular system do what God built it to do.

Your body is a temple. Start treating it like one.
