

Bring This To Your Doctor, Sugar Corner

You have started steadying the sugar corner of your blood pressure. This page helps you have a better conversation at your next visit. Bring it with you. It is a way to share what you are doing and to ask good questions, so you and your doctor read your numbers together. It is not instructions for your doctor, and nothing here is a reason to change a medication on your own.

THE READINGS I AM BRINGING

Write in a few of your recent home readings (date, time, and the number).

The lifestyle changes I have started

- Removed refined sugar, artificial sweeteners, and refined carbohydrates
- A 20-minute morning walk within an hour of waking
- Fiber-first meals (vegetables and beans before the grain)
- Easing toward two meals a day with the kitchen closed after supper
- Plant-forward, whole-food eating

Herbs and supplements I have added: Berberine, cinnamon (Ceylon), and chromium, added one at a time and with food.

Important: I have not changed my meal timing or skipped meals without asking you first, because I understand glucose-lowering medication on top of skipped meals can drop blood sugar too low.

Questions to ask about my numbers

- Looking at the fasting and post-meal numbers I brought, how do they look to you?
- What fasting and post-meal ranges would you like me to aim for?
- When would you like to recheck my A1C?
- How often would you like me to check my glucose at home?

Questions to ask about my current medication

- Here are the glucose readings I have been logging. Would you review them with me?
- I am adding berberine, cinnamon, and chromium, which can lower blood sugar. Are any of these a concern alongside my current medication?
- If I begin spacing my meals into a shorter eating window, is there anything about my medication timing you would want to look at first?
- As my numbers improve, what would you want to see before we discuss any medication change, and how would you want to approach it?
- Is there any sign of low blood sugar I should watch for and report to you?
